1 **Fast detection of communication patterns in distributed executions**

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Publisher: IBM Press

Full text available: [pdf\(4.21 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

2 **Effects of scent and breadth on use of site-specific search on e-commerce Web sites**

Michael A. Katz, Michael D. Byrne

September 2003 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 10
Issue 3

Publisher: ACM Press

Full text available: [pdf\(2.34 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Users faced with Web sites containing many possibly relevant pages often have a decision to make about navigation: use the menu of links or use the provided site search function. Two studies were conducted to examine what users do when faced with this decision on e-commerce Web sites, and how users go about deciding which method to attempt. An exploratory study revealed a wide distribution of searching and browsing behavior across sites and users. Counter to some predictions, use of the site sea ...

Keywords: Searching, WWW, browsing, e-commerce, empirical studies, information retrieval, navigation

3 **Environment mobility: moving the desktop around**

Dag Johansen, Håvard Johansen, Robbert van Renesse

October 2004 **Proceedings of the 2nd workshop on Middleware for pervasive and ad-hoc computing MPAC '04**

Publisher: ACM Press

Additional Information:

Full text available:  [pdf\(328.34 KB\)](#)

[full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this position paper, we focus on issues related to middleware support for software mobility in ad hoc and pervasive systems. In particular, we are interested in moving the computational environment of a mobile user following his or her trajectory. We present details of WAIFARER, a prototype implementation that automatically saves and restores application level state to support this mobility. Security, integrity, and fault-tolerance are just some of the key problems that need to be addressed ...

Keywords: mobile code, pervasive computing

SEARCH

Nothing Found

Your search for **+spool, +orphan, +"assign priority", selectable policy, +"published object list"** did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +art

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago

Tip: Try removing quotes from your search to get more results.

Your search - **spooling, orphaned, remove, purge, pruning, assign priority, selectable policy, "published object list"** - did not match any documents.

Suggestions:

- Make sure all words are spelled correctly.
- Try different keywords.
- Try more general keywords.
- Try fewer keywords.
